Mr. A. F. Sampson, Commissioner
Public Buildings Service
General Services Administration
Washington, D. C. 20405

Dear Mr. Sampson:

Thank you for your letter of 2 December 1971 concerning this Agency's proposed garage construction and its potential environmental impact.

After due consideration, it has been determined that construction of the garage as proposed will not adversely affect the environment within the meaning of the National Environmental Policy Act of 1969 (Public Law 91-190). The environmental statement contained in the Statement of Background Data of 13 July 1971, as presented to the National Capital Planning Commission, set forth the conditions on which this determination was based.

The Agency recognizes its responsibility as "Lead Agency" in making the above determination; however, it is requested that the General Services Administration continue to insure that the design of the project proceeds in consonance with the spirit and intent of the National Environmental Policy Act of 1969 and the requirements of the National Capital Planning Commission.

Sincerely,

(signed) John W. Coffey
